

Enjoy daily bathing and comfort feelings

“Liberty Ajisai” transforms bed into a bathtub. It supports bathing care, the hardest task for caregivers. The care receivers can enjoy their daily bathing, assuring the safety while reducing the burden of caregivers.

Portable Bathing Device Liberty Ajisai

- Multi-function body pressure dispersion / Mattress for bed sore prevention
- Air bathtub / Cover Sheet for water splash

Multi-function body pressure dispersion / Mattress for bed sore prevention

Multi-function body pressure dispersion prevents bed sore

The mattress uses “Especially high-density soft polyurethane foam”. Its dual structure with moderate resiliency gently supports the body to prevent the bedsores. It connects to the air bathtub with an inward drainage system.

Liberty Himawari (automatic excretion treatment apparatus) is also available with this device.

Air bathtub, easy to set up and put away

The air bathtub can be set up in the bed by just shifting the user’s posture without moving them out of bed. Avoiding the accidents, like falling off the bathtub. Its compact storage allows a single caregiver to carry, set up and put away in a moment.

Even a 180cm-tall person can stretch out.

Cover Sheet for water splash prevention

Set up frame poles as a bed guard, with a cover sheet preventing water splash over the walls or floor. The user can bathe at ease within a room.

How to set up the air bathtub

Prepare the air bathtub on the mattress. Care giver can set it up while shifting the user’s body, just as changing the bedsheet.
